

## **ecoLong is seeking DevOps Engineer**

We are currently seeking a highly motivated, self-driven, and knowledgeable DevOps Engineer to join our team supporting our continued growth and innovation to build interconnected and resilient communities.

**Objective:** As an experienced DevOps Engineer you will be an integral part of our team, supporting the deployment of ecoLong's software solutions such as: energy trading and optimization, [[link](#)], cybersecurity, [[link](#)], among others.

**Primary Responsibilities for the role** (including, but not limited to):

- Automate the compilation, continuous integration, testing, packaging, and distribution of multiple software components
- Monitor and improve operation performance and stability
- Work closely with developers to tailor tools and solutions for rapidly evolving needs
- Continuously discover, evaluate, and implement new technologies or services to maximize operation efficiency and reliability

**Ideal candidates will possess the following:**

- B.S./M.S., in Computer Science or a related discipline
- 2+ years of experience as a DevOps Engineer
- Experience with Python, Java, or Go
- Experience working with Docker and Kubernetes
- Automation experience using Ansible, Terraform, and/or Helm
- Deep understanding of large-scale data systems and data pipelines including NoSQL, SQL, etc.
- Experience with continuous integration and delivery systems like AzureDevOps, Circle CI, etc.
- Excellent verbal and written communication skills
- A passion and interest in clean energy

**About ecoLong:**

ecoLong is an energy technology startup located in Albany, New York that is committed to building resilient communities by leveraging interconnected and smart devices. By partnering with leading research institutions, smart technology partners, communities, and our customers,

we strive to build best in class enterprise-grade technology solutions to actively monitor, optimally control, and intelligently manage energy assets and create grid-interactive and efficient communities at scale. For more information, please visit our website [eco-long.com](http://eco-long.com)

To apply for this opportunity, please send your resume to [jobs@ecolongllc.com](mailto:jobs@ecolongllc.com) with “DevOps Engineer” in the subject line.

**Additional information about this position:**

- Opportunity to join a rapidly growing startup that is making a transformative impact
- Constant exposure to interesting science and novel technologies
- Opportunity to build relationships with other technology leaders in the emerging technology and energy ecosystems
- Dynamic workplace with flexible work arrangements

ecoLong, a woman-owned business (WBE), is committed to a diverse and inclusive work environment dedicated to building interconnected and resilient communities. In support of this commitment, we encourage all to apply for employment.

**Salary and Benefits :**

Commensurate with experience annual base salary ranging from \$90,000 to \$120,000. Benefits include health insurance, 401(k) with employer match, paid time off, and health and wellness benefits.
